## **NestMax & SPEEDMASTER**

**NestMax 3/8", 10 mm & 1/2" up to 35 metres/minute**

**\*SPEEDMASTER 1/2" up to 50 metres/minute**

Your CNC router is designed for feed-rates and production volumes that cannot be achieved with conventional tooling. Only with the unique geometries, cutting edge materials and core tensile strength of the NestMax & SPEEDMASTER series can you realise your lost potential and maximise production throughput and see your CNC production improve dramatically!

Spiral design is optimized with unique tool geometry that achieves extreme feed rates, optimum edge finish and maximizes tool life. The combination of proprietary carbide, advanced manufacturing techniques and geometries enable a high number of service cycles while maintaining exceptional cutting performance.
